# SIS Bone Profiler

Useful Simple Effective

#### **Features**

Excellent bone removal from the fixture neck
Multiple diameters available
Compatible with all implant systems

#### **Access implant platform**

Easily remove bone blocking access to the fixture connection

### Safe and easy to use

No need for a guide screw or fixture attachment

Remove bone and create the appropriate outline for healing abutments, impression copings, and temporary and final prosthetics

Remove bone from the implant shoulder without damage to the fixture

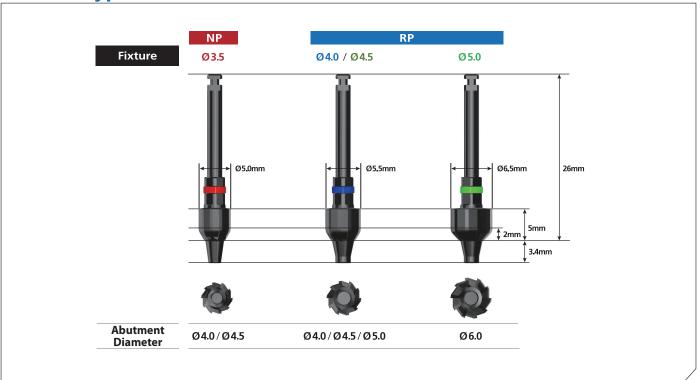

\* Use only if the bone interferes with the abutment's emergence profile If the abutment height is above 4mm, refrain from bone profiling

## **Bone Profiler** Line-up

#### Internal Type ( Luna § )

#### External Type ( **Sola §** )
